EDUCATION

Babcock University

B.Sc. Software Engineering

Ogun State, Nigeria

Expected Graduation, July 2026

- o **Cumulative GPA:** 4.84/5.00
- o **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Introduction to Web Development, Model Based Software Engineering, Software Security Engineering, Programming with C and C++, Programming in Java, Programming Techniques in VB.NET, Embedded Systems, Object Oriented Software Development, Linux System Administration, Artificial Intelligence and Applications

EXPERIENCE

Stalwart Crest Ltd

Software Engineer

Remote

Sep 2024 – Present

- Developed a comprehensive CRUD API for employee management using Spring Boot, integrating with a frontend application and optimizing performance for a 30% reduction in response time.
- Implemented robust data validation, security measures, and successfully mitigated vulnerabilities through regular audits and code reviews.
- Collaborated effectively with cross-functional teams in an agile environment, demonstrating strong communication and problem-solving skills.

UCCSchools

Web Developer

Remote

Jun 2024 – Present

- Developed and launched a high-performing website for UCCSchools using Django, HTML, SCSS, Bootstrap, Node.js, Lightbox, and Microsoft Azure, resulting in a 45% increase in inquiries within the first 2 months.
- Managed all aspects of the project, from design and development to launch and maintenance, demonstrating strong project management, full-stack development and cloud deployment skills.
- Implemented SEO best practices, elevating the school's search engine ranking from the 3rd to the 1st position for relevant keywords, significantly enhancing online visibility and lead generation.

School Portal Administrator

Jan 2024 – Jun 2024

- Managed and maintained the school portal for regulating the transfer of over 100 students, creating classes and generating Learners' Identification Numbers(LINs) on the Digital Platform for Education Revitalisation (DiPER) provided by the state.
- Provided technical support and resolved issues for 12 staff members using the portal, increasing their efficiency by 100%.

Software Development Unit

Software Developer

Babcock University

Sep 2023 – Dec 2023

- Worked with a team of developers responsible for the migration of the official website of Babcock University to a new platform, successfully transitioning over 15,000 users (students, parents, staff, and external stakeholders) to the enhanced platform.
- Spearheaded the migration of the school's news section to the new platform, ensuring timely and accurate content delivery. Managed image uploads, content updates, and information architecture to enhance user experience.
- Revamped the postgraduate departmental information section, improving information accessibility and retrieval by 50% through streamlined data organization and presentation.
- Resolved critical alignment issues within the CMS by implementing custom HTML code, ensuring optimal visual presentation of the website.
- Gained hands-on experience in a fast-paced development environment, mastering agile methodologies and contributing to the overall project success.
